## NeuroSolutions

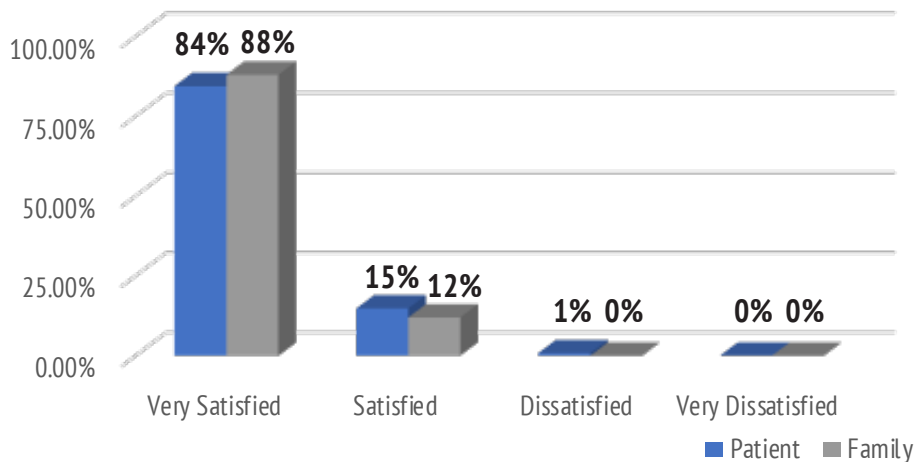

### Creative Approach – Proven Results

Rehab Without Walls® (RWW) provides specialized, interdisciplinary and outcome-based care. We have 30 years of experience helping patients recover the functional skills they need. Our skilled therapists are dedicated to healing, educating and empowering patients to take charge of their own care. This leads to rapid and lasting functional independence and patient success.

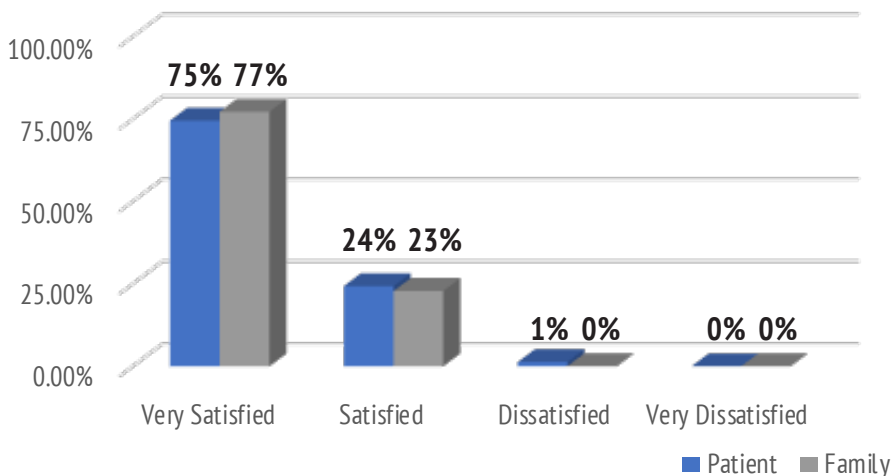

The provision of outstanding, compassionate care is a hallmark of RWW. We consistently seek feedback from our patients, their families and caregivers and value their suggestions for improvement. Satisfaction surveys are offered at the time of discharge and can be completed anonymously through a survey link. Customer satisfaction is an integral component of the RWW performance improvement program and is reviewed at the national, location and program level.
