

Rehab Without Walls® home and community rehab blends evidence-based therapies with creative uses of the patient's own surroundings – whether at home, school, work, or in their own community.

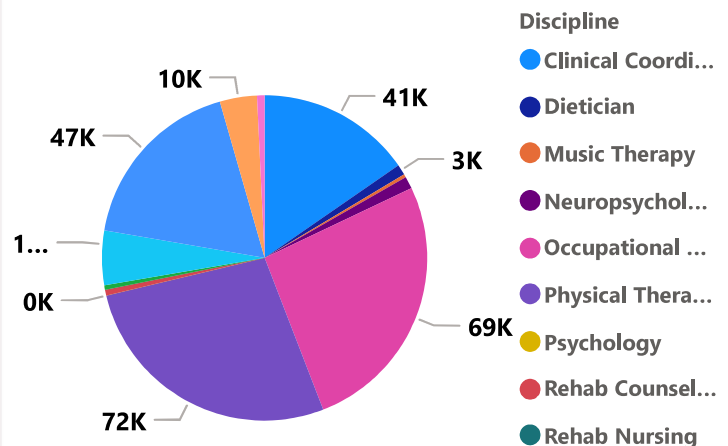

Addressing goals and barriers in real-life settings can increase motivation, lead to more durable outcomes and reduce the risk of injuries that could lead to rehospitalization

Primary Diagnosis of Persons Served

Interdisciplinary Team By Service Hours

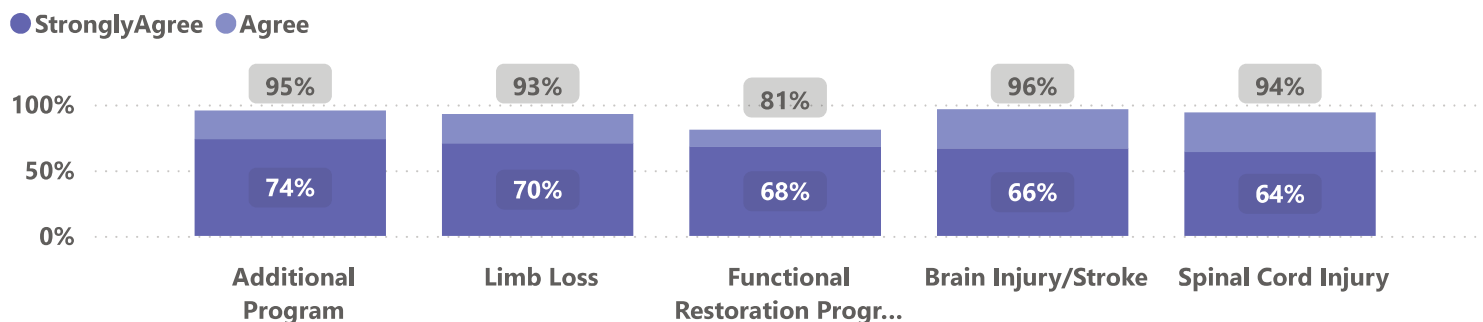

Satisfaction Survey N = 422

91.4% of patients agree/strongly agree in knowing how to get help in the community

96.8% of patients would recommend us to a family member or friend

96.1% of patients agree/strongly agree services met their expectations

Overall Program Benchmark

Supervision Rating Scale

(Higher the Percentage the Better)

The Supervision Rating Scale presents a compelling outcome from our home and community-based rehabilitation program, tracking patients' ability to stay home alone for 8 hours or more at three key points: admission, discharge, and 3 months post-discharge. This metric is a powerful indicator of patients and the programs success!

MPAI - 4 Average Scores at Admission & Discharge

Ability

Ability
Ability skills help us think, walk, and communicate.

Adjustment

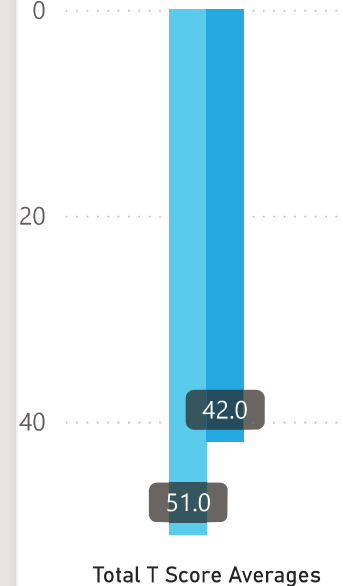

Adjustment
Adjustment skills minimize anxiety and depression.

Participation

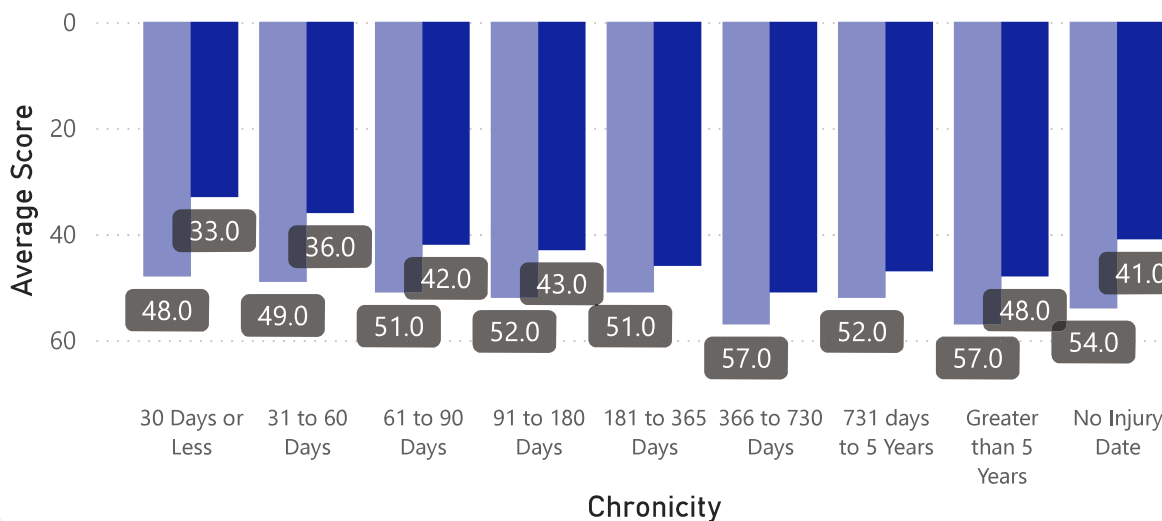

Participation
Participation skills improve self-care, and help return to work or school.

Total

Admit n= 219
Discharge n= 223

MPAI - 4 By Chronicity

The Earlier RWW Home and Community Begins Services From Injury the Greater the Result.

RWW Continues to See Improvement Greater than 5 Years Post Injury.
