

Rehab Without Walls® home and community rehab blends evidence-based therapies with creative uses of the patient's own surroundings – whether at home, school, work, or in their own community.

Addressing goals and barriers in real-life settings can increase motivation, lead to more durable outcomes and reduce the risk of injuries that could lead to rehospitalization.

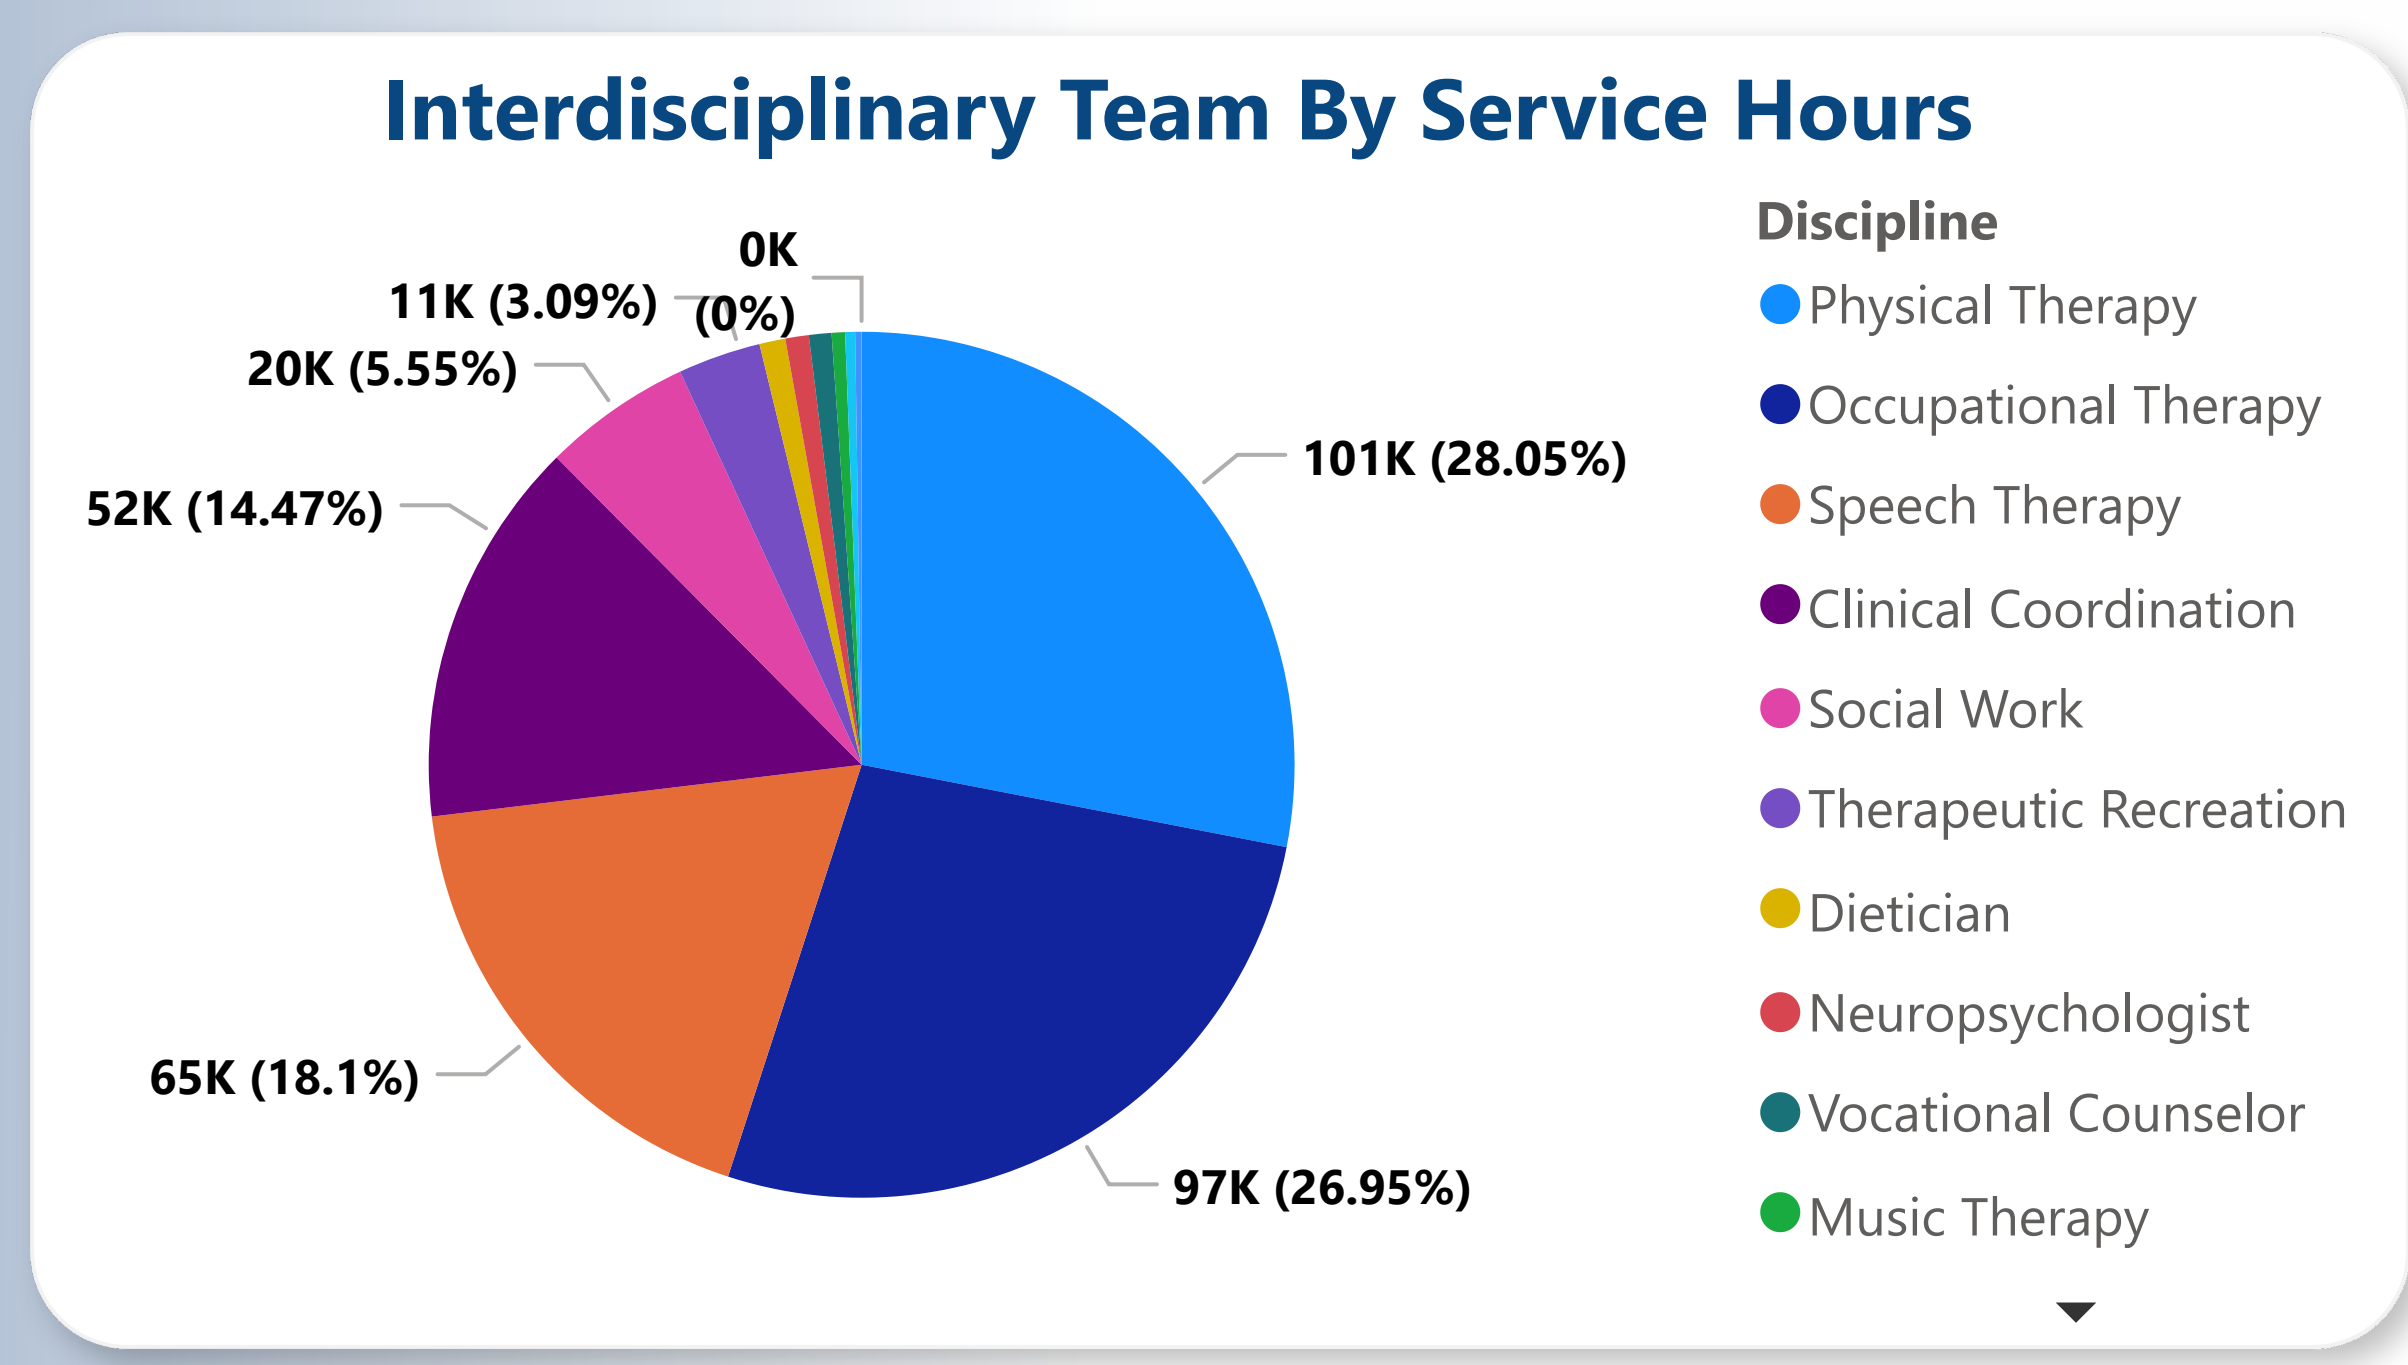

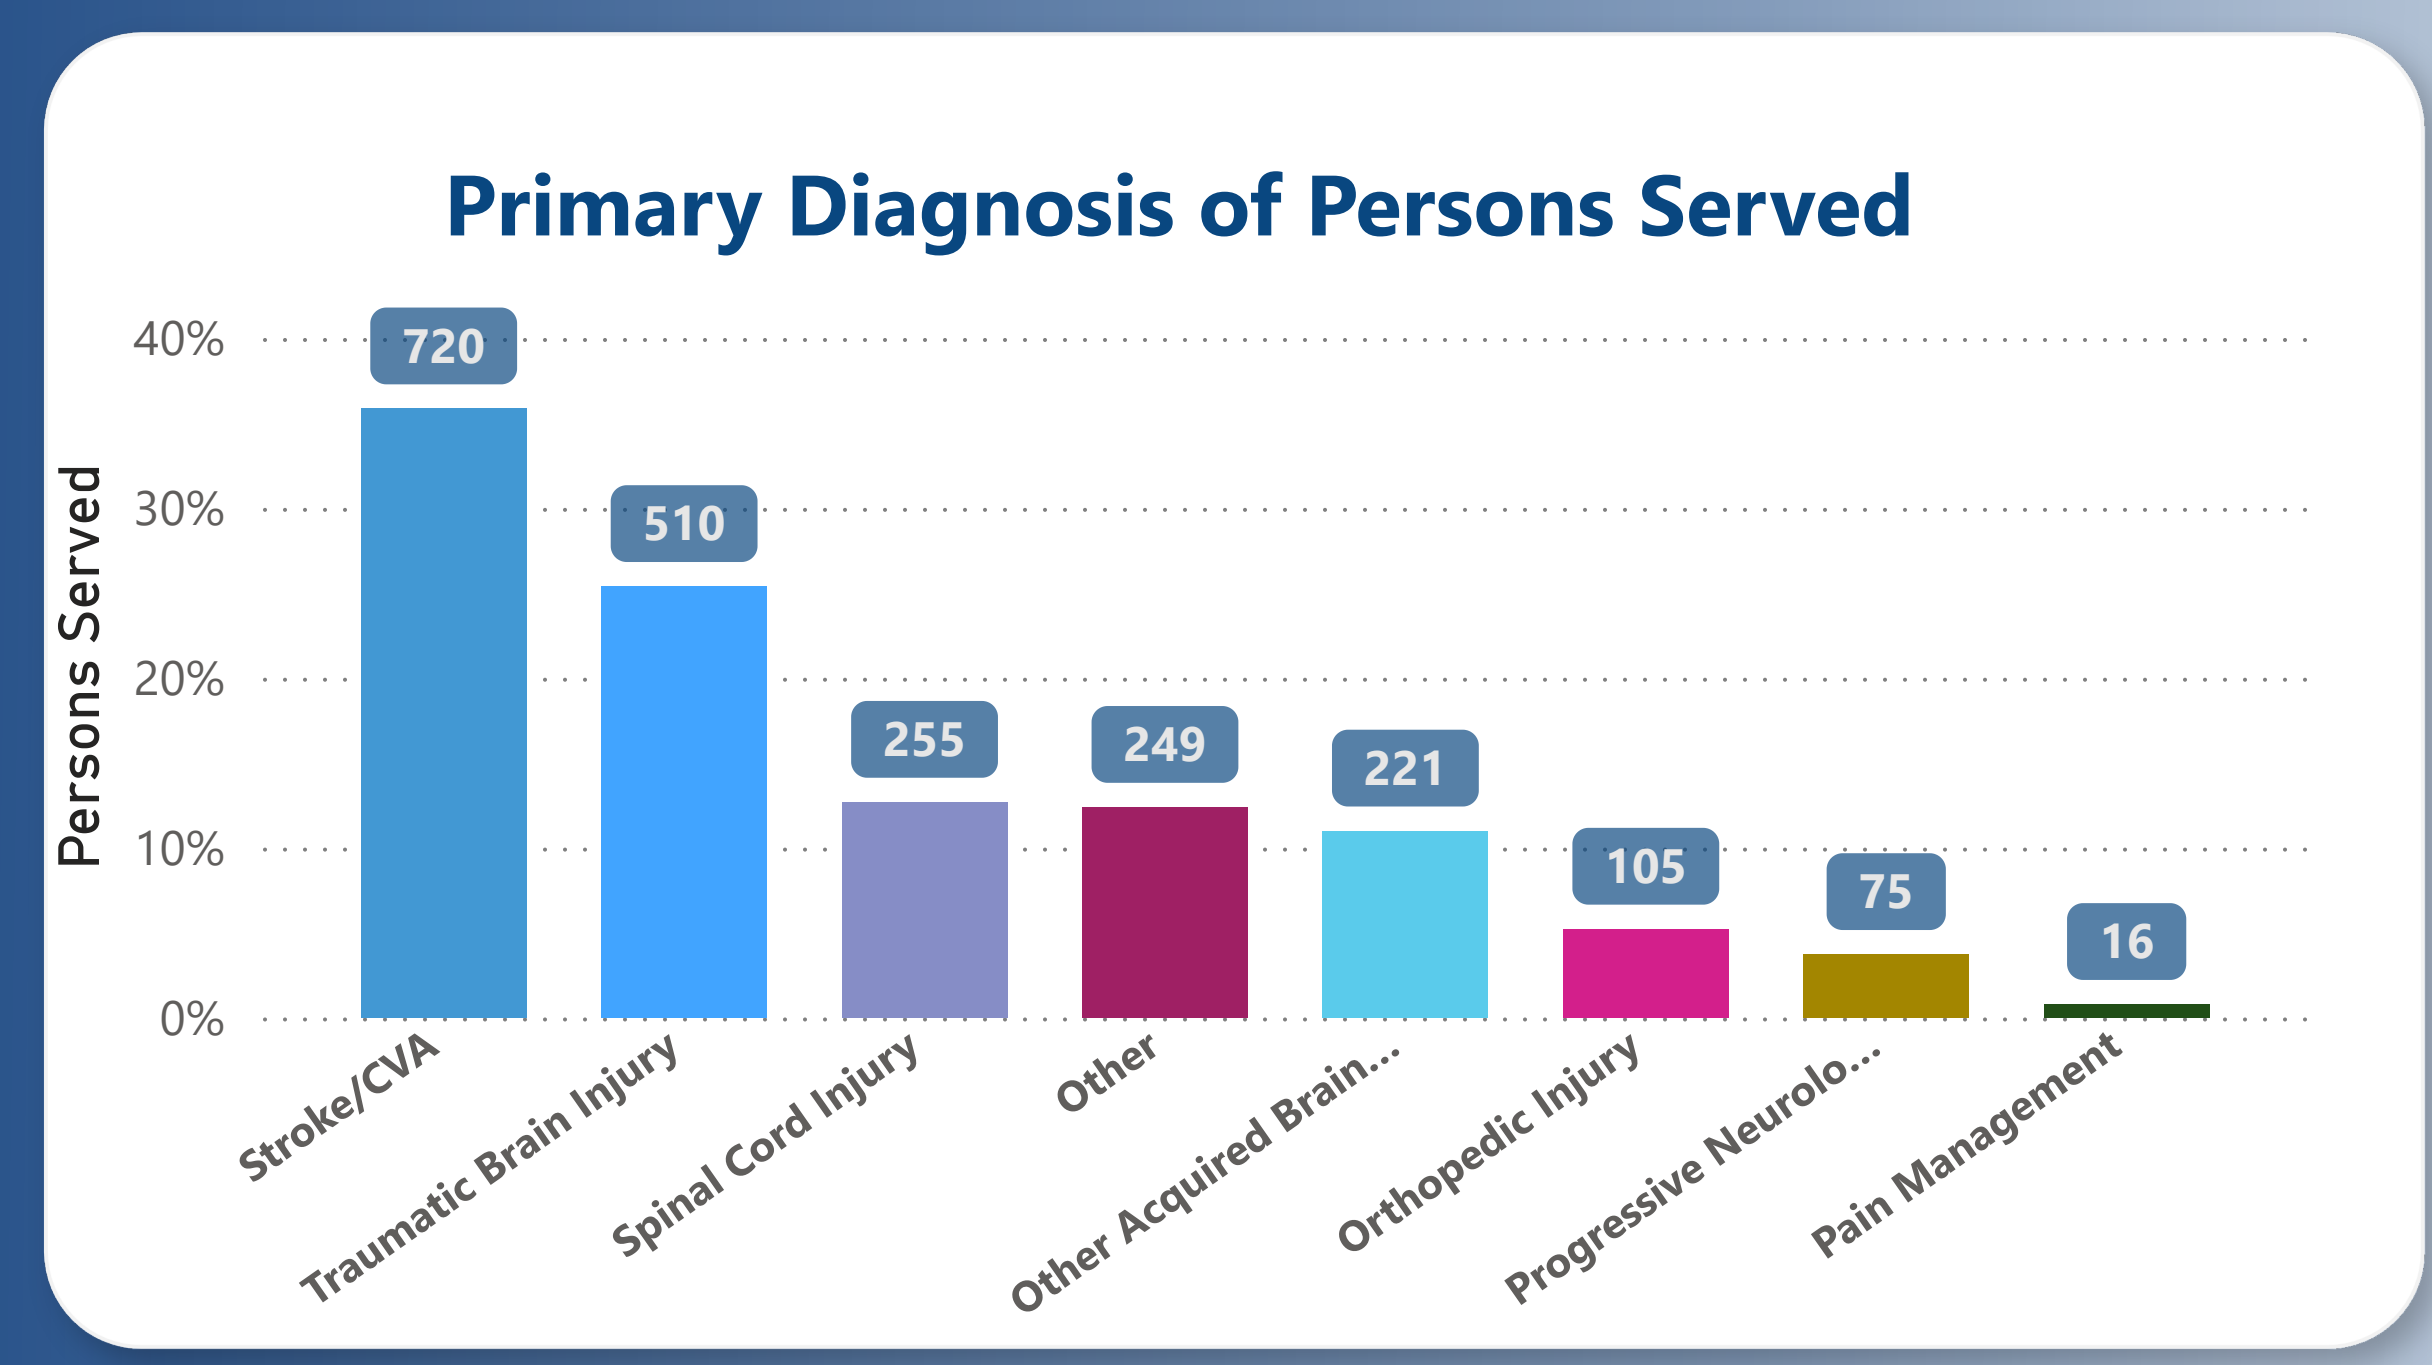

MPAI - 4 Average Scores at Admission & Discharge

The Earlier RWW Home and Community Begins Services From Injury the Greater the Result.

RWW Continues to See Improvement Greater than 5 Years Post Injury.

Satisfaction Survey N = 535

95% of patients agree/strongly agree services met their expectations
